THE HONORABLE JAMES L. ROBART

UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

LONDI K. LINDELL,

Plaintiff,

v.

CITY OF MERCER ISLAND, a Washington
municipal corporation; MERCER ISLAND CITY
MANAGER RICHARD CONRAD, in his official
and individual capacities; MERCER ISLAND
DEPUTY MAYOR JIM PEARMAN, in his
official and individual capacities; MERCER
ISLAND COUNCILMEMBER ERNEST
JAHNCKE, in his official and individual
capacities; MERCER ISLAND FINANCE
DIRECTOR CHARLES CORDER, in his official
and individual capacities,

Defendants.

No. CV 08-1827 JLR

DECLARATION OF ALLISON
GOODMAN IN SUPPORT OF
PLAINTIFF'S OPPOSITION TO
DEFENDANT'S MOTION TO DISMISS

1 I, Allison Goodman, being duly sworn on oath under penalty of perjury under the laws
2 of Washington State and the United States depose and say:

3
4 **BACKGROUND**

5 1. I am over the age of eighteen and competent to testify to the matters set forth
6 herein based upon my personal knowledge.

7 2. I am the President of eDiscovery Inc., a consulting firm that provides computer
8 forensic services and electronic discovery consulting to law firms and corporate counsel
9 nationwide. I am a Certified Computer Examiner and have forensically examined hundreds of
10 hard drives throughout the course of my career. I have the requisite knowledge, experience and
11 training to analyze and inform the court on issues related to the forensic examination of
12 computer hard drives. A copy of my curriculum vitae, along with a list of the cases in which I
13 have testified is attached as Exhibit 1. I have been qualified and testified as an expert in court
14 and in mandatory arbitration with JAMS.

15 3. I was retained by The Blankenship Law Firm on Tuesday, March 15, 2010, to
16 evaluate the opinions offered by Allan Muchmore in this matter. I know Mr. Muchmore, as he
17 has hired me on a number of instances to perform computer forensic exams for his clients. I did
18 not realize Mr. Muchmore performed computer forensics examinations. It was my
19 understanding that his primary work was to provide IT support to law firms.

20 4. However, I believe Mr. Muchmore is intelligent and ethical and when presented
21 with the evidence set forth below, he will agree that the evidence does not support an assertion
22 that Londi Lindell used the CCleaner program or that the free space¹ of the hard drive in her
23 computer has been wiped.

24
25 ¹ The "free space" of a hard drive is the area of the hard drive that the operating system identifies as being available
26 for data storage (it is "free" or "unallocated"). Files that have been deleted will still exist in this part of the hard
drive unless they have been overwritten by other data. "Wiping" a hard drive overwrites all of the data with other
characters so none of the deleted information can be recovered.

CCLEANER PURPOSE AND FUNCTION

9. CCleaner is not a “wiping program” and is not designed to “permanently remove information from a computer.” By default CCleaner removes temporary internet files and other system files. This is the information provided on the CCleaner website:

CCleaner

Optimization and Cleaning

CCleaner is the number-one tool for cleaning your Windows PC. It protects your privacy online and makes your computer faster and more secure. Easy to use and a small, fast download.

10. CCleaner is not designed to eliminate email or any user-created documents. The screenshot on page 11 of Muchmore’s Dec shows the categories of files that CCleaner impacts. These include system files created by Internet Explorer, Windows Explorer and the overall operating system. For the most part, these are files that the average user does not even know exist and often cannot even be viewed by most users. None of the files CCleaner deletes would be within the scope of discovery requests or be considered “reasonably accessible” under FRCP 26.

11. Furthermore, CCleaner does not “permanently remove information from a computer”. CCleaner does have the option of overwriting the free space of the hard drive. See Declaration of Allan Muchmore, ¶7 and the screenshot on page 11 identified above. As noted by this screenshot and acknowledged by Mr. Muchmore, this option is not selected by default.

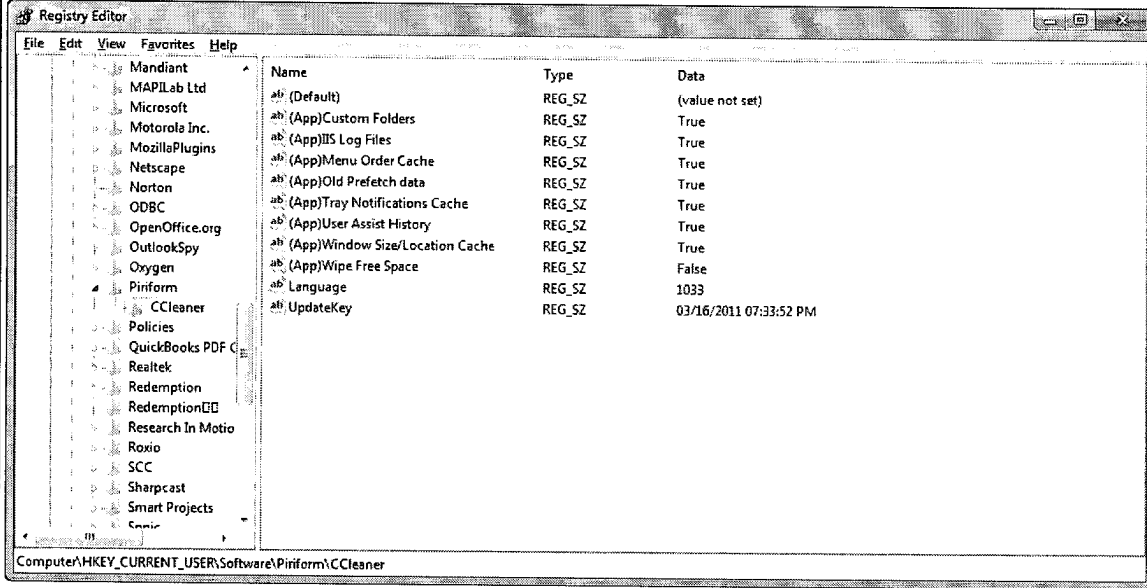

12. Only if the option to wipe the free space of the hard drive is selected would CCleaner “permanently” delete any data. Mr. Muchmore acknowledges that he and Blank Law + Technology both have the tools necessary to recover the deleted data from the free space of a hard drive if the hard drive has not been “wiped.”

CCLEANER OPTION TO WIPE FREE SPACE NOT USED

1
2 13. The standard use of CCleaner would not permanently remove data. I have
3 recovered thousands of files after individuals have used CCleaner on their computers. The
4 option to wipe the free space of the hard drive would need to be selected in order to
5 permanently remove any data. And the registry entries Mr. Muchmore relies on to show that
6 CCleaner was installed and executed show that the “Wipe Free Space” option was **not** selected.
7 See screenshots on pages 7 and 8 of the Muchmore Dec. which show the Wipe Free Space
8 option as “False.”

9 14. Despite this clear evidence that the Wipe Free Space option for CCleaner was
10 not selected, Mr. Muchmore conducted testing and determined that at one point the Wipe Free
11 Space box was checked and then unchecked. ¶8(vi). Mr. Muchmore is correct – the Wipe
12 Free Space box was checked and then unchecked. Mr. Weibling acknowledges that when he
13 uses CCleaner he uses all of the options EXCEPT wiping the free space. ¶10 of Weibling Dec.
14 He does this by clicking once on the Advanced Options tab which automatically selects ALL of
15 the options and then he deselects (or unchecks) the Wipe Free Space option. Because the free
16 space of a hard drive is generally very large (possibly hundreds of gigabytes), wiping the free
17 space can be very time-consuming.

18 15. I have tested the exact scenario Mr. Weibling describes and the following is a
19 screenshot of the registry entries from my testing.

11 The Wipe Free Space option is identified as False – just as it is in the registry entries
 12 from Ms. Lindell’s Dell laptop. Screenshots on pgs. 7, 8 and 14 of Muchmore Dec.

13 16. But what is even more important is that these registry entries were made and the
 14 CCleaner program was never executed. This is consistent with Mr. Muchmore’s testing and
 15 conclusions identified in ¶18(vii) where he states that the option to Wipe Free Space was checked
 16 and then unchecked. At no point does Mr. Muchmore identify testing or other evidence to show
 17 that the CCleaner program was executed or actually used when the Wipe Free Space option was
 18 checked.

19 **THE HARD DRIVE HAS NOT BEEN WIPED**

20 17. Mr. Muchmore does not state that the hard drive was wiped, but his Declaration
 21 does tend to leave that impression. But Mr. Muchmore either failed to examine or failed to
 22 identify evidence he was provided that proves conclusively that the free space of the hard drive
 23 was **not** wiped in either March or August 2010.

24 18. Attached as Exhibit 2 is a document that was contained on the CD I received
 25 from Blank Law+Technology. This is the same data that I have been told was provided to Mr.
 26 Muchmore. Note the file name at the bottom of the document is

1 “D:/DriveFreeSpace00117[751267]. The name of this document shows that this data was
2 carved from the “Drive Free Space” or the free space of the hard drive. This is the part of the
3 hard drive that would have been wiped if CCleaner had been used for that purpose.

4 19. This document shows a login to the bhansenstair@hotmail.com account, similar
5 to what is described by Mr. Muchmore in ¶8(b)(i) of his declaration. It is the type of
6 **temporary** data that Windows and Internet Explorer capture during Internet activity. The
7 document does not have all of the graphics or advertisements that appear when a person logs
8 into Hotmail or other web-based email accounts, and it is **not** interactive (e.g., you cannot
9 actually see the data within each of the folders like you could if you were logged into the email
10 account).

11 20. The first and second pages list the folder structure (Inbox, Junk, Drafts, Sent,
12 etc.) and the last two pages list the email that appears when a user first logs in to their account.
13 Again, it is not possible to read or view the email that is listed on this page. This document is
14 simply capturing what gets displayed on the computer screen when a user logs into their web-
15 based email account.

16 21. But what this document does show is email that is dated from June 10, 2009
17 through August 27, 2009. The most recent email entry on this document is for the day it was
18 viewed and the second entry was the previous day (identified as “Yesterday”). I was able to
19 view this particular Hotmail account and determined that the email with the subject line “Fwd:
20 Grand Canyon May 18 -2010” is still in existence and is dated August 26, 2009. The following
21 is an excerpt from a screenshot of that particular Hotmail account. The screenshot of the entire
22 account is attached as Exhibit 3.

23
24  cardiacrep

 Fwd: Grand Canyon May 18 - 2010

8/26/09

1 25. In this case, CCleaner was last executed in August and the computer hard drive
2 was not imaged until November. And the CCleaner program was not uninstalled. This is very
3 inconsistent with what I have observed during my years as a computer forensic examiner. I
4 have worked on many other cases where different programs were used to eliminate data –
5 programs specifically designed for this purpose such as “Evidence Eliminator”. Unlike
6 CCleaner, Evidence Eliminator wipes the free space of the hard drive by default. And in all
7 such cases, the programs had been uninstalled before I imaged the hard drive for examination.

8 26. I have seen nothing that instructed Ms. Lindell to preserve Internet activity and
9 without such specific instruction it is unreasonable to expect a computer user to know that such
10 information was potentially relevant. Virtually all average computer users and even some IT
11 technicians do not realize that web-based email can be captured on the hard drive just like any
12 other Internet activity. While many computer users have a vague understanding that some of
13 their Internet activity is being captured, I have never encountered an average computer user that
14 realized that portions of their web-based email may be captured. When it is explained that
15 viewing web-based email is just like any other Internet activity, then it makes sense that email
16 data may be captured, but it is unreasonable to expect a user to know this without specific
17 instruction. And as shown by Exhibit 2, the “email” that is captured is not the real email.

18 **NO EVIDENCE THAT ANY EMAIL WAS LOST OR DESTROYED**

19 27. Exhibit 3 shows email that still exists in the bhansenstair@hotmail.com account.
20 Exhibit 2 represents data from the Temporary Internet folder which is the exact type of data that
21 CCleaner is designed to remove. This data was recovered from the free space of the hard drive.
22 So not only was the free space of the hard drive not wiped, but nothing was done to the actual
23 email. Using CCleaner has no impact on the actual email.

24 **CONCLUSION**

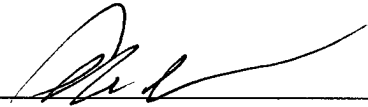

25 28. The free space of this hard drive was not wiped in March or August 2010.

26 29. Ms. Lindell did not install or use the CCleaner program.

1 30. There is no evidence that relevant emails, documents, or other non-temporary or
2 system files have been deleted and Ms. Lindell's entire Live email account has been preserved.

3
4
5 I certify or declare under penalty of perjury under the laws of the State of Washington
6 and the United States that the foregoing is true and correct:

7
8
9 SWORN TO this 18th day of March, 2011 at Seattle, Washington.

Allison Goodman is the President of eDiscovery Inc., a consulting firm that provides electronic discovery and computer forensic services to law-firms and corporate counsel nationwide.

Prior to founding eDiscovery Inc. Ms. Goodman was an electronic discovery and computer forensics consultant at Computer Forensics Inc. and Navigant Consulting, Inc.

Ms. Goodman is a Certified Computer Examiner with more than 20 years experience in managing electronic discovery issue and over six years as a computer forensic examiner. She has been trained or has experience with all major electronic discovery and computer forensic programs such as EnCase, Forensics Tool Kit, X-ways, Summation and Concordance. Ms. Goodman has provided expert testimony in numerous cases involving electronic discovery and computer forensics.

Selection of Relevant Experience

- » *Computer Forensic Projects* – Ms. Goodman has imaged and examined hundreds of hard drives to ascertain computer activity (copying files, inappropriate Internet activity by employees, use of certain programs, etc.). She has significant experience in drafting reports and declarations.
- » *Intellectual Property Theft* – Ms. Goodman has worked on many cases involving the potential theft of intellectual property and has located and identified data on hard drives that often results in a timely resolution of the matter.
- » *Spoilation*– During her computer forensic examinations, Ms. Goodman has located and identified numerous programs designed to eliminate data and can frequently determine if these programs were actually executed on the hard drive at issue.
- » *eDiscovery Consultation* – Ms. Goodman has worked with several governmental agencies and many of the nation's major law firms and corporations to assist in properly identifying and preserving potentially responsive data within reasonable parameters.
- » *Expert Testimony* – Ms. Goodman has testified in court, at depositions and in private arbitration hearings as well as through dozens of declarations.

Publications

- » *Identification, Collection and Preservation of ESI*, Keeping up with eDiscovery, NBI – 2009
- » *Native File Review – Low Cost Options*, WSPA 3rd Annual Litigation Technology Conference - 2007
- » *Advanced Civil Discovery*, Institute for Paralegal Education, NBI - 2000.
- » *Discovery Techniques*, Institute for Paralegal Education, NBI – 1998.

Lectures, Courses, and Presentations

- » *eDiscovery Certification Program*, University of Washington, Guest Speaker – April, 2010
- » *Women in eDiscovery*, Collection Options – March, 2009
- » *National Institute of Business Seminar*, Keeping up with eDiscovery – November 2008
- » *Litigation Technology Conference*, Washington State Paralegals Association – February 2007
- » *Computer Forensics Certification Program*, University of Washington, Guest Speaker – October 2006 and October 2005.
- » *Electronic Discovery Training*, Washington State Attorney General's Office, Lacey, WA – September 2005.
- » *Computer Forensics*, ARMA, Fort Worth Chapter, Fort Worth, TX - May 2005.
- » *Current Issues in E-Discovery*, Washington State Paralegal Association (WSPA), Seattle, WA - February 2005.
